Subject Index

Acrylamide
photoinitiation mechanism of acrylamide polymerization in the presence of water-soluble benzophenones, 347
Acylation
influence of the solvent and excited state prototropic equilibria on photochemical intramolecular acylation of *trans*-3-(2-hydroxybenzylidene)-4,5-dihydrofuran-2(3*H*)-one, 297
Alkaloids
fluorescence characteristics of β-carboline alkaloids in highly concentrated hydroxide solutions, 193
Amines
photocatalytic production of amines from alcohols and aqueous ammonia, 121
structure–reactivity relationship for fluorescence quenching of *trans*-stilbene by tertiary amines, 185
Ammonia
$NH_2(\tilde{A}\,^2A_1)$ and $NH(A\,^3\Pi)$ formation from continuous wave IR laser irradiation of NH_3, 1
photocatalytic production of amines from alcohols and aqueous ammonia, 121

Benzaldehyde
photolysis study of the suspension benzaldehyde solution–silica gel, 211
Benzoinhydrazone
photochemistry of benzoinhydrazone derivatives, 331
Benzophenones
photoinitiation mechanism of acrylamide polymerization in the presence of water-soluble benzophenones, 347

β-Carboline
fluorescence characteristics of β-carboline alkaloids in highly concentrated hydroxide solutions, 193
Carbonyl compounds
dicarbonyl and related compounds as sensitizers for photo-oxidative desulphurization at pentavalent phosphorus, 39
Complexes
individual quantum yields of $Fe^{3+}(HCO_2^-)_n$ complexes (n = 1 - 4) in aqueous acidic solutions, 279
individual quantum yields of Fe^{3+}-$OX_n^{2-}H_m^+$ complexes in aqueous acidic solutions ($OX^{2-} \equiv C_2O_4^{2-}$, n = 1 - 3, m = 0, 1), 289
Continuous wave IR lasers
$NH_2(\tilde{A}\,^2A_1)$ and $NH(A\,^3\Pi)$ formation from continuous wave IR laser irradiation of NH_3, 1
o-Coumaric acid
competition between fluorescence and photoisomerization for *o*-coumaric acid and *o*-methoxycinnamic acid in aqueous solution, 11
Cyanide
photochemical reduction of gold(III) on semiconductor of TiO_2 in the presence of CN^- ions: disposal of CN^- by treatment with hydrogen peroxide, 373
Cycloalkanones
external spin–orbit coupling on the $^3n,\pi^*$ state of several cycloalkanones, 141
Cyclohexenes
some new examples of "trans" cyclohexenes: properties characteristic of these species, 311

Deactivation
deactivation of excited singlet aromatic hydrocarbons by metallic ions in ethanol–water solution, 177
Desulphurization
dicarbonyl and related compounds as sensitizers for photo-oxidative desulphurization at pentavalent phosphorus, 39
Diketoboronates
spectroscopy, photophysics and photochemistry of 1,3-diketoboronates

© Elsevier Sequoia/Printed in The Netherlands

VI: the exciplexes of 2-naphthyl-substituted 1,3-diketoboronates, 27

Dyes
photochemical regeneration of acid dye receptor sites: a new method *for differential dyeing of polyamides*, 113

Electron spin resonance
formation of semiquinone radicals by electron transfer from or to photoexcited $Ru(bpy)_3^{2+}$: an electron spin resonance study, 267

Electron transfer
formation of semiquinone radicals by electron transfer from or to photoexcited $Ru(bpy)_3^{2+}$: an electron spin resonance study, 267

Esters
mechanistic studies of the photorearrangement of *o*-nitrobenzyl esters, 85
photochemical production of semiquinone radicals of *o*-methylfluorescein methyl ester in ethanol, 51

Ethylenes
photoisomerization of 1,2-diarylethylenes: photophysical properties of 5(*E*)-styryl-1,3-dimethyluracil, 163

Excimers
prompt and delayed excimer fluorescence of naphthalene in poly(methyl methacrylate) matrix, 205

Exciplexes
spectroscopy, photophysics and photochemistry of 1,3-diketoboronates VI: the exciplexes of 2-naphthyl-substituted 1,3-diketoboronates, 27

Flash photolysis
flash photolysis studies of nitrile imines and related intermediates photogenerated from sydnones and tetrazoles in fluid solutions, 63
photochemistry of thioxanthones VI: a polymerization, spectroscopic and flash photolysis study on novel water-soluble substituted 3-(9-oxo-9*H*-thioxanthene-2,3-γ-4-yloxy)-*N,N,N*-trimethyl-1-propanaminium salts, 99

Fluoranthenyl group
a new "one-way"-photoisomerizing aromatic olefin: the effect of a fluoranthenyl group on the triplet energy surface, 125

Fluorescence
competition between fluorescence and photoisomerization for *o*-coumaric *acid and o-methoxycinnamic acid* in aqueous solution, 11

Furans
influence of the solvent and excited *state prototropic equilibria on photochemical intramolecular acylation of trans-3-(2-hydroxybenzylidene)*-4,5-dihydrofuran-2(3*H*)-one, 297

Gold
photochemical reduction of gold(III) on semiconductor of TiO_2 in the presence of CN^- ions: disposal of CN^- by treatment with hydrogen peroxide, 373

Hydrocarbons
deactivation of excited singlet aromatic hydrocarbons by metallic ions in ethanol–water solution, 177

Hydrogen peroxide
photochemical reduction of gold(III) on semiconductor of TiO_2 in the presence of CN^- ions: disposal of CN^- by treatment with hydrogen peroxide, 373

Imidazoles
effect of solvents and pH on the spectral characteristics of 2-(3′-hydroxyphenyl)benzimidazole and 2-(4′-hydroxyphenyl)benzimidazole and their methoxy derivatives, 149

Imines
flash photolysis studies of nitrile imines and related intermediates photogenerated from sydnones and tetrazoles in fluid solutions, 63

Intermediates
metastable intermediate in the formation of ozone by recombination, 235

Iron
individual quantum yields of $Fe^{3+}(HCO_2^-)_n$ complexes (n = 1 - 4) in aqueous acidic solutions, 279
individual quantum yields of Fe^{3+}-$OX_n^{2-}H_m^+$ complexes in aqueous acidic solutions ($OX^{2-} \equiv C_2O_4^{2-}$, n = 1 - 3, m = 0, 1), 289

Metal ions
deactivation of excited singlet aromatic hydrocarbons by metallic ions in ethanol–water solution, 177
Methoxy compounds
competition between fluorescence and photoisomerization for *o*-coumaric acid and *o*-methoxycinnamic acid in aqueous solution, 11
effect of solvents and pH on the spectral characteristics of 2-(3′-hydroxyphenyl)benzimidazole and 2-(4′-hydroxyphenyl)benzimidazole and their methoxy derivatives, 149
Methyl methacrylate
studies in photopolymerization
IV: photopolymerization of methyl methacrylate using peroxydiphosphate as a photoinitiator, 365

Naphthyl compounds
photophysical properties of 1,8-naphthalimide derivatives, 323
prompt and delayed excimer fluorescence of naphthalene in poly(methyl methacrylate) matrix, 205
spectroscopy, photophysics and photochemistry of 1,3-diketoboronates
VI: the exciplexes of 2-naphthyl-substituted 1,3-diketoboronates, 27
Nitrophenols
evidence for physical quenching of singlet oxygen ($O_2(^1\Delta_g)$) by dinitrophenols, 247
Nitrosyl chloride
the absorption spectrum of ClNO between 190 and 350 nm, 133

Olefins
a new "one-way"-photoisomerizing aromatic olefin: the effect of a fluoranthenyl group on the triplet energy surface, 125
Oxalates
individual quantum yields of $Fe^{3+}(HCO_2^-)_n$ complexes (n = 1 - 4) in aqueous acidic solutions, 279
Oxygen
evidence for physical quenching of singlet oxygen ($O_2(^1\Delta_g)$) by dinitrophenols, 247
Ozone
metastable intermediate in the formation of ozone by recombination, 235

Peroxydiphosphate
studies in photopolymerization
IV: photopolymerization of methyl methacrylate using peroxydiphosphate as a photoinitiator, 365
pH effects
effect of solvents and pH on the spectral characteristics of 2-(3′-hydroxyphenyl)benzimidazole and 2-(4′-hydroxyphenyl)benzimidazole and their methoxy derivatives, 149
Phosphorus
dicarbonyl and related compounds as sensitizers for photo-oxidative desulphurization at pentavalent phosphorus, 39
Photocatalysis
photocatalytic production of amines from alcohols and aqueous ammonia, 121
Photoinitiation
photoinitiation mechanism of acrylamide polymerization in the presence of water-soluble benzophenones, 347
studies in photopolymerization
IV: photopolymerization of methyl methacrylate using peroxydiphosphate as a photoinitiator, 365
Photoisomerization
a new "one-way"-photoisomerizing aromatic olefin: the effect of a fluoranthenyl group on the triplet energy surface, 125
competition between fluorescence and photoisomerization for *o*-coumaric acid and *o*-methoxycinnamic acid in aqueous solution, 11
photoisomerization of 1,2-diarylethylenes: photophysical properties of 5(*E*)-styryl-1,3-dimethyluracil, 163
Photolysis
photolysis study of the suspension benzaldehyde solution–silica gel, 211
Photo-oxidation
dicarbonyl and related compounds as sensitizers for photo-oxidative desulphurization at pentavalent phosphorus, 39
Photoreactors
industrial photochemistry VIII: light repartition in heterogeneous cylindrical photoreactors, 221

Photorearrangement
mechanistic studies of the photorearrangement of *o*-nitrobenzyl esters 85
Polyamides
photochemical regeneration of acid dye receptor sites: a new method for differential dyeing of polyamides, 113
Poly(ethylene oxide)
photobehavior of pyrene end-labelled poly(ethylene oxide) in methanol–water mixtures, 389
Polymerization
photochemistry of thioxanthones VI: a polymerization, spectroscopic and flash photolysis study on novel water-soluble substituted 3-(9-oxo-9*H*-thioxanthene-2,3-γ-4-yloxy)-*N,N,N*-trimethyl-1-propanaminium salts, 99
photoinitiation mechanism of acrylamide polymerization in the presence of water-soluble benzophenones, 347
studies in photopolymerization IV: photopolymerization of methyl methacrylate using peroxydiphosphate as a photoinitiator, 365
Poly(methyl methacrylate)
prompt and delayed excimer fluorescence of naphthalene in poly(methyl methacrylate) matrix, 205
Prototropic equilibria
influence of the solvent and excited state prototropic equilibria on photochemical intramolecular acylation of *trans*-3-(2-hydroxybenzylidene)-4,5-dihydrofuran-2(3*H*)-one, 297
Pyrene
photobehavior of pyrene end-labelled poly(ethylene oxide) in methanol–water mixtures, 389

Quenching
evidence for physical quenching of singlet oxygen ($O_2(^1\Delta_g)$) by dinitrophenols, 247
structure–reactivity relationship for fluorescence quenching of *trans*-stilbene by tertiary amines, 185

Reactivity
structure–reactivity relationship for fluorescence quenching of *trans*-stilbene by tertiary amines 185
Redox chemistry
redox chemistry of water-soluble vanadyl porphyrins, 255
Ruthenium
formation of semiquinone radicals by electron transfer from or to photoexcited $Ru(bpy)_3^{2+}$: an electron spin resonance study, 267

Semiconductor dispersions
photochemical reduction of gold(III) on semiconductor of TiO_2 in the presence of CN^- ions: disposal of CN^- by treatment with hydrogen peroxide, 373
Semiquinone radicals
formation of semiquinone radicals by electron transfer from or to photoexcited $Ru(bpy)_3^{2+}$: an electron spin resonance study, 267
photochemical production of semiquinone radicals of *o*-methylfluorescein methyl ester in ethanol, 51
Sensitizers
dicarbonyl and related compounds as sensitizers for photo-oxidative desulphurization at pentavalent phosphorus, 39
Silica gel
photolysis study of the suspension benzaldehyde solution–silica gel, 211
Solvent effects
effect of solvents and pH on the spectral characteristics of 2-(3′-hydroxyphenyl)benzimidazole and 2-(4′-hydroxyphenyl)benzimidazole and their methoxy derivatives, 149
influence of the solvent and excited state prototropic equilibria on photochemical intramolecular acylation of *trans*-3-(2-hydroxybenzylidene)-4,5-dihydrofuran-2(3*H*)-one, 297
Spin–orbit coupling
external spin–orbit coupling on the $^3n,\pi^*$ state of several cycloalkanones, 141
Stilbene
structure–reactivity relationship for fluorescence quenching of *trans*-stilbene by tertiary amines, 185
Structure
structure–reactivity relationship for fluorescence quenching of *trans*-stilbene by tertiary amines, 185

Styryl compounds
photoisomerization of 1,2-diarylethylenes: photophysical properties of 5(*E*)-styryl-1,3-dimethyluracil, 163
Sydnones
flash photolysis studies of nitrile imines and related intermediates photogenerated from sydnones and tetrazoles in fluid solutions, 63

Tetrazoles
flash photolysis studies of nitrile imines and related intermediates photogenerated from sydnones and tetrazoles in fluid solutions, 63
Thioxanthones
photochemistry of thioxanthones VI: a polymerization, spectroscopic and flash photolysis study on novel water-soluble substituted 3-(9-oxo-9*H*-thioxanthene-2,3-γ-4-yloxy)-*N*,*N*,*N*-trimethyl-1-propanaminium salts, 99
Triplets
a new "one-way"-photoisomerizing aromatic olefin: the effect of a fluoranthenyl group on the triplet energy surface, 125

Uracil
photoisomerization of 1,2-diarylethylenes: photophysical properties of 5(*E*)-styryl-1,3-dimethyluracil, 163

Vanadyl porphyrins
redox chemistry of water-soluble vanadyl porphyrins, 255
